ADITYA KUSHWAHA

Technical Project Portfolio & Showcase

+91-9173106494 | aditya8kushwaha@gmail.com | Kanpur, Uttar Pradesh, India

This portfolio highlights key technical projects completed during my Bachelor of Technology (Computer Science & Engineering) curriculum, demonstrating core competencies in database management, data organization, automation, and information architecture relevant to analytical and operational roles.

CORE DATA & ANALYTICAL SKILLS

Database Management: SQL, DBMS, Cloud Firestore, relational schema design, and data querying.

Information Processing: Data cleaning, structural reporting, text summarization, and data tracking.

Automation & Tools: Python scripting, generative AI tools, spreadsheet data workflows, and logic building.

KEY ACADEMIC PROJECTS

1. College Mail Summarizer

Python, AI Tools, Data Structuring

Engineered an automated information processing platform designed to parse, categorize, and summarize large volumes of daily institutional communications. Built a highly structured user interface that simplified mail processing, improved data accessibility, and significantly reduced information overload by translating chaotic textual inputs into clean, actionable data reports.

2. TaskIN — Service Marketplace System

Firebase Authentication, Cloud Firestore, Flutter

Developed a cross-platform application managing end-to-end data flows between local service providers and end consumers. Architected and managed a secure, centralized database system via Cloud Firestore, handling real-time data updates, accurate user entry tracking, and secure authentication workflows while maintaining zero database downtime.

3. JUSTRENTVIT — Peer-to-Peer Rental Platform

DBMS, Database Schema Design, UX Logic

Designed and deployed a structural database and front-end interface for a student asset-sharing utility. Formulated precise database logic to accurately log, track, and update product availability records, ensuring complete data consistency across user transactions while minimizing processing delays.

CERTIFICATIONS & VERIFICATIONS

• **IBM Generative AI Certification:** Hands-on experience deploying Python automation scripts and text processing tools.
• **Technical Degree:** B.Tech in Computer Science and Engineering, Vellore Institute of Technology (VIT) Bhopal.
